

## Using my latex style citations

I want to make a reference right here [**item1**]

## Pandoc with citeproc-hs

- [**@nonexistent**]
- **@nonexistent**
- **item1** says blah.
- **item1** says blah.
- **item1** says blah.
- **item1**, **item2**, **item3** says blah.
- In a note.<sup>1</sup>
- A citation group [**item1**, **item3**].
- Another one [**item1**].
- And another one in a note.<sup>2</sup>
- Citation with a suffix and locator [**item1**].
- Citation with suffix only [**item1**].
- Now some modifiers.<sup>3</sup>
- With some markup [**item1**].

---

<sup>1</sup>A citation without locators [**item3**].

<sup>2</sup>Some citations [**item2**, **item3**, **item1**].

<sup>3</sup>Like a citation without author: [**item1**], and now Doe with a locator [**item2**].
